

Plant Care

As a guideline, areas designated "sunny" are south or west facing, with no more than three hours of shade daily: "part-shade" are east facing at least six hours of sun; and "shady" are north-facing or woodland beds with virtually no full sun.

PRE-PLANTING CARE: if you buy perennials and cannot plant them the same day, water them thoroughly and place them in the shade to prevent excessive wilting.

PLANTING: Evenings and cloudy days are the best times to plant. To aid in root development add Mycorrhizae to the planting hole before planting. Tickle the roots then place in the ground so that all the roots are well covered and the plant itself is anchored in the soil. Water thoroughly and protect from direct sun and winds until it is re-established. Fertilize a week after planting.

WATERING: Water perennials thoroughly to give them a good start, then only as the soil begins to dry. Do it early in the day with a soaking technique at ground level. A sprinkling on the foliage isn't sufficient and it could promote disease. Avoid watering late at night, this may also cause diseases.

LIMITED WARRANTIES

TREES, SHRUBS, & ROSES	1 YEAR
PERENNIAL	1 YEAR
TROPICAL/HOUSEPLANTS	30 DAYS
ANNUALS	NO WARRANTY
HARDGOODS	30 DAYS
FASHION & JEWELRY	30 DAYS
